Secondly, the area studied in this research is an upland and its fringes, with a dispersed settlement pattern, which is an environment of a type still under-represented in work on landscape development. In particular, work on woodland has, until recent years, tended to focus on the southern,
eastern and central lowlands of England, which may have more centralised patterns of settlement. Thirdly, the geographical area selected for study, Exmoor and its fringes, saw relatively little sustained scholarly work until the s, in comparison to other uplands of the south-west, and knowledge of its past land use has consequently been extremely limited.

Perceptions of its woodland have been conditioned by the need to collect data for management purposes, generating a series of surveys and assessments carried out from the mids. The results of these surveys, which recorded a high level of archaeological features relating to woodland management, indicate that further progress can now be made by analysing and interpreting the data. The period covered by this research runs from the date of Domesday Book to the early 19th century. Grand Eagle Retail is the ideal place for all your shopping needs! With fast shipping, low prices, friendly service and over 1, in stock items - you're bound to find what you want, at a price you'll love! Please view eBay estimated delivery times at the top of the listing. We are unable to deliver faster than stated. NOTE: We are unable to offer combined shipping for multiple items purchased.

This is because our items are shipped from different locations. The Fields of Britannia project: interim report. Iron Age to early modern activity and palaeochannels at Magor Pill, Gwent: an exercise in lowland coastal-zone geoarchaeology. Landscapes in transition: the later Roman and early medieval periods. Making the Most of a Bad Situation? Manifestations of Empire: palaeoenvironmental analysis and the end of Roman Britain. Mid- to late-Holocene vegetation history of Greater Exmoor, UK: estimating the spatial extent of human-induced veg Postgraduate Research in the Severn Estuary. Review article: managing the historic Landscape.
