This work gives multiple examples and acknowledges that pockets of the partnership approach do exist and are growing, but there are significant challenges to be addressed before we can truly begin to benefit from the improved standard of living that more ‘caring societies’ can bring. I can’t recommend this book highly enough for anyone at a loss to why the world seems to have become so divisive and uncaring, this deeply researched, erudite text stands back and shows us where we’ve been and where we could go, and what policies need to change to bring us to a more humane era. Essential research and a vision for humanity Understanding that most of our intractable global challenges can be tied to the dominator world view is a starting point for a sustainable and humane world. Much of our public discourse misses the core dysfunction and disease of our patriarchal dominator culture.

The authors employ a systems approach: the biocultural partnership-domination lens. Ultimately, they argue that partnership models work to support human flourishing, while domination models actively create harm for all involved. These features of domination systems create stress, and with this, a general sense of anxiety, insecurity, and fear, which affects brain function. By substituting coercive parenting with loving affection and promoting compassion as a societal value regardless of gender, we will have the necessary foundation to reform our economic structures to incentivize caregiving and collective well-being. This book is well-formulated, prescriptive, and inspiring. Please pick up a copy. Congratulations on another inspiring book!

Riane Eisler Millions of jobs in manufacturing and service industries have been taken over by automation and robotics, with artificial intelligence and nanotechnology about to take millions more. The only solution is changing the economic system so it rewards the work only humans can do: caring for people and nature. Riane Eisler Ending public sector cuts for teachers and caregivers avoids not only suffering but also economic disaster. Riane Eisler People living in a system that at every turn impedes the fulfillment of their basic human needs — not only for love but for creative and spiritual expression - will try to compensate for this in other ways, including the compulsive acquisition of ever more material goods.

This groundbreaking book should be required reading for all world leaders and decision makers. I urge you to read this seminal cultural contribution for yourselves. And how can we construct a sustainable world where we might all flourish? This book addresses these universal questions at our particular historical moment of anxiety and uncertainty about the future, offering a counter-narrative to the outburst of dystopias over the past few decades It contains a message of hope for the future, a future which is dependent on the choices we make now. Understanding that most of our intractable global challenges can be tied to the dominator world view is a starting point for a sustainable and humane world. Domination has brought humanity to a dead-end. Our survival depends on building a new era defined by partnership and cooperation, with humans living as caring, gender equal, planetary citizens.

Anyone who is seeking to understand the current human condition, and wishes for an enlightened way forward, I invite you to read this book. Embracing partnership with life-affirming purpose may be the only way to save ourselves from ourselves. This has freed me from that sound bite sloganeering we hear. She offers plenty of resources to dig deeper. Remember, tyrants fear thinking citizens. We are dangerous to them and they know it. Author 7 books. An Important Must Read Book I was beginning to believe there was no hope in getting out of the mess mankind had made for itself. This is a well-documented examination of how things got so bad and a positive plan for building a new world based on partnership and respect. A fascinating array of research and findings that refute our old ways of thinking. University Press Scholarship Online.

Author: Riane Eisler. Pages: pages. Language: eng. ISBN: Nurturing Our Humanity offers a new perspective on our personal and social options in today's world, showing how we can build societies that support our great human capacities for consciousness, caring, and creativity. It brings together findings--largely overlooked--from the natural and social sciences debunking the popular idea that we are hard-wired for selfishness, war, rape, and greed. Its groundbreaking new approach reveals connections between disturbing trends like climate change denial and regressions to strongman rule. Moving past right vs. Western, and other familiar categories that do not include our formative parent-child and gender relations, it looks at where societies fall on the partnership-domination scale.

Nurturing Our Humanity offers a new perspective on our personal and social options in today's world, showing how we can build societies that support our great human capacities for consciousness, caring, and creativity. It brings together findings--largely overlooked--from the natural and social sciences debunking the popular idea that we are hard-wired for selfishness, war, rape, and greed. Its groundbreaking new approach reveals connections between disturbing trends like climate change denial and regressions to strongman rule. Moving past right vs. Western, and other familiar categories that do not include our formative parent-child and gender relations, it looks at where societies fall on the partnership-domination scale.

On one end is the domination system that ranks man over man, man over woman, race over race, and man over nature. On the other end is the more peaceful, egalitarian, gender-balanced, and sustainable partnership system. Nurturing Our Humanity explores how behaviors, values, and socio-economic institutions develop differently in these two environments, documents how this impacts nothing less than how our brains develop, examines cultures from this new perspective including societies that for millennia oriented toward partnership, and proposes actions supporting the contemporary movement in this more life-sustaining and enhancing direction.

It shows how through today's ever more fearful, frenzied, and greed-driven technologies of destruction and exploitation, the domination system may lead us to an evolutionary dead end. A more equitable and sustainable way of life is biologically possible and culturally attainable: we can change our course. This edition Format pages, Hardcover. Language English. More details.
